

Colony PCR
V.0
From David Alexander aka the Crazy Frenchman
NDJ

Make master mix of PCR for insert. Aliquot master mix into numbered PCR tubes.
Draw numbered grid on LB plate (with selective antibiotic)..

1. Pick colony from cloning attempt
2. Wipe on Grid in sequential order
3. Swish for two seconds in aliquot of PCR in tube corresponding to number on LB plate grid
4. Run PCR for insert

Retrieve positive colonies from LB plate.
